## Save Energy, Save Money

When buying an appliance, remember that it has two price tags: what you pay to take it home and what you pay for the energy and water it uses.

ENERGY STAR qualified appliances incorporate advanced technologies that use 10-50% less energy and water than standard models.

The money you save on your utility bills can more than make up for the cost of a more expensive but more efficient ENERGY STAR model and some units can qualify for tax credits from the State.

Visit [www.oregon.gov/energy](http://www.oregon.gov/energy) for tax credit details.
