## ***RECOMMENDED PSP EQUIPMENT PROTECTORS***

**PSP Vortex W200ET** -- Plugs directly into the wall of a home and protects facsimile and answering machines, plus kitchen appliances such as refrigerators and microwaves. Includes PSP \$6,000,000 Lifetime Warranty and connected equipment coverage.

**PSP Vortex V1500D** -- An 8-plug strip to protect satellite dish systems, home entertainment centers, home office equipment, television sets, stereo equipment and home theatre systems. It also has cable TV protection capability. Includes PSP \$6,000,000 Lifetime Warranty and connected equipment coverage.

**PSP Vortex V1500T** -- Another 8-plug strip for high-end consumer electronics, home computer systems with telephone/fax and modem protection. Includes PSP \$6,000,000 Lifetime Warranty and connected equipment coverage.

**PSP MP-90-4J** -- A residential device that prevents external spikes and surges from entering the home and damaging major appliances, such as refrigerators and stoves. **To protect sensitive electronic equipment such as computers, a separate surge suppressor strip must be used.** The Meter Pro device is placed at the electrical service entrance directly between the power coming into the home and the meter itself. A Central Electric serviceman must install this unit. Includes PSP 20-year Product Warranty. PSP will cover up to \$10,000 to repair or replace (whichever is less) residential "standard white appliances" which sustain surge damage.

Protect your household appliances from these often spectacular lightning storms with a "Meter Pro" surge protector at your home's meter. This surge protector, installed at your home's meter base, protects your major white appliances from catastrophic lightning surges. ***It does not, however, protect computers and entertainment systems.***

***To protect your sensitive electronic equipment, such as computers and home entertainment systems, PSP Vortex plug-in surge suppressors must be used.*** These devices protect your equipment from external surges as well as internal surges that can be created within the home.

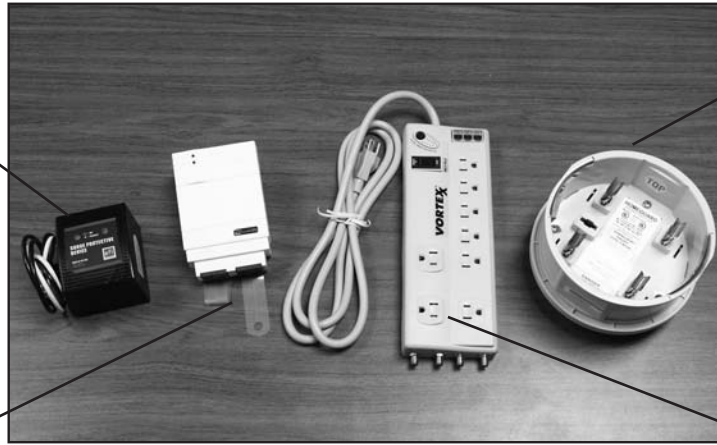

Central Electric now offers the finest surge suppressor systems on the market, sold to you at cost, plus shipping and handling from the manufacturers, PSP Products of Manassas, Virginia.

These units are available at Central Electric's Redmond, Bend or Sisters offices or by mail. All suppressor units have a lifetime warranty. Prices and model numbers are on the back of this brochure.

**\* PSP will repair or replace properly connected equipment damaged by electrical surges or lightning for the lifetime of the PSP product.**
